09

Food Ordering Kiosk

A food ordering kiosk allows customers to browse menus, customize orders, and make payments seamlessly.

It enhances efficiency, reduces wait times, minimizes errors, and provides a contactless, user-friendly ordering experience in restaurants and cafes.

10

Visitor Management Kiosk

A visitor management kiosk automates check-ins, identity verification, and badge printing for guests.

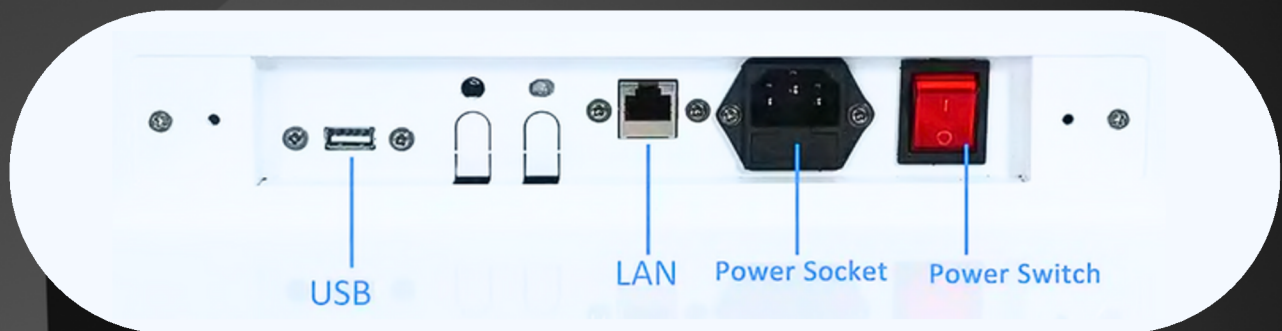

It enhances security, reduces manual workload, streamlines visitor tracking, and ensures a seamless and professional entry experience in offices and institutions.

Adaptive Interface Ports for Versatile Usage

Using both Windows and Android operating systems, the standing kiosks are designed with different interface ports like HDMI, USB, LAN, Audio, RS232, RJ-45, etc.
